

ELECTRIC DOWNRIGGER

Description

The electric downrigger from Sardamatic is efficient, small and light. The cable is stocked on the drum of the downrigger, you place the sinker at the end of it as well as the automatic line release. At the other end of the automatic line release, the fishing line is attached to it.

When a fish bites, the tension on the line releases the automatic line release and you are left battling with just the fish. It is ideal when you are alone. The frame is made of stainless steel.
