

ENROULEURS DE LIGNES - PLIOIRS

NOUVEAU

Description

It is a real manual fishing reel which eases your trolling fishing performances (*ideal for paravanes, etc*).

Nylon or braids are stored on the drum, avoiding lines distortions / tangling (*unlike traditional fishing winder*). The line keeps its original characteristics.

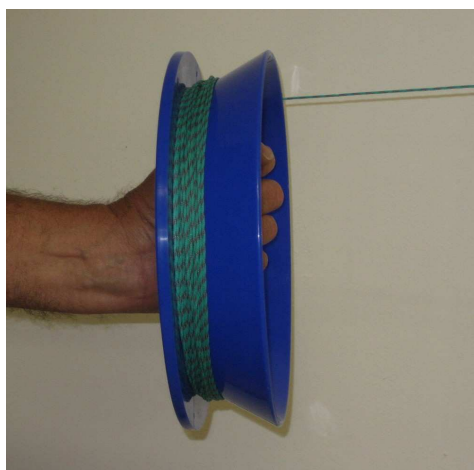

The handcaster is hold by its central handle.

The line is released by its own weight on the conical part of the handcaster and is stopped by a simple turn of your wrist.
