

INSTALLATION KIT

The electric haulers reference 910 and 930 as well as the electric reel 901 are delivered with its standard installation kit.

All these equipments incorporate a transport handle. Their davit arms are removable to reduce and facilitate its storage.

Elements provided

- Stainless steel foot: self-blocking and multiple positions (8 choices)
- Male electric plug 16A, waterproof
- Female electric socket 16A, waterproof
- 1 spare fuse 16A
- 3 stainless steel screws (TFHc 8 x 30)

Description

- **Stainless steel foot self-blocking: REF 930 600**

It is made of a fixation plate for the bulkhead with a stainless steel guiding tube (length: 130mm). Its star shape enables to orientate the square tube of our electric haulers and fishing reels. Therefore, our equipments can be self-blocked in one of the 8 positions.

- **Male electric plug 16A, waterproof: REF A000332**

Pre-installed on the cable (length: 80cm) of the electric equipments.

- **Female electric socket 16A, waterproof: REF A000333**

Ready to install.
